

COMPANY POLICY

EUROMAG INTERNATIONAL S.r.l. has always been committed to offering to customers high quality flowmeters, which are produced according to controlled processes and by qualified personnel. They have to meet the requests and expectations of the most demanding customer, as well as the relevant applicable mandatory requirements (with particular reference to those relating to work, safety, environmental management and product).

The Company, in order to obtain the tools to be able to withstand the commitments assumed, considers strategic the application of a Quality-oriented Management System which, at the same time, guarantees that the processes implemented safeguard the Environment.

EUROMAG INTERNATIONAL S.r.l. Management has decided to implement, within the Company, the provisions of the UNI EN ISO 9001 and UNI EN ISO 14001 standards, wishing at the same time to start the organizational mechanisms that can ensure the maintenance of this approach over time. In particular, the following objectives are pursued:

1. To meet the expectations:

- of Customers, regarding:
 - technical qualities of the flow meters supplied (in terms of accuracy, duration, reliability),
 - compliance with the mandatory requirements for the products (CE marking for the relevant requirements: MID, ATEX, Low Voltage, EMC, etc.),
 - respect for delivery times,
 - general quality of the service
- of the remaining interested parties (local community, internal staff, etc.), regarding:
 - compliance with the mandatory requirements, with particular reference to the environmental and occupational safety aspects relating to its activities
 - context in which the production site is located

2. To achieve a suitable position in the market sector and a constant improvement of the corporate image;

3. Optimization and continuous improvement of processes, in order to improve their performance (environmental, qualitative, economic, etc.) and to prevent pollution, emergencies, accidents, injuries and non-conformities, in particular:

- limiting the consumption of raw materials and waste production to the maximum and pursuing recovery-oriented management
- limiting to the maximum atmospheric emissions
- preventing environmental accidents with particular reference to spills and soil pollution
- pursuing continuous innovation through R&D processes
- pursuing the development of products with "environmental" destination/use (eg products with insertion technology that involve extremely limited dimensions and weights, products destined to leakage detection in water networks, etc.)

In order to offer an increasingly complete and qualified service to customers, the Management has decided to give significant development to the internal Calibration Centre (with the aim of accrediting it according to the ISO / IEC 17025 standard), whose activities are guided and based on company guidelines established with a specific dedicated policy.

All staff will be striving to achieve these objectives which have to be considered indispensable and the testimony of this involvement will be provided by the diffusion, among the members of the organization, of an attitude of constant continuous search for improvement.

Qualifying elements of the Company Policy:

1. The constant attention paid to the customer's requests, both for the explicitly declared needs and for those implicitly contained in the product, are EUROMAG INTERNATIONAL's behaviour and rule of conduct, guaranteeing at the same time compliance with the rules for environmental management that have been defined at corporate level
2. The punctual and periodic analysis of the context and the parties involved, the related requirements and the related risks/opportunities
3. The involvement of all staff, according to their role, in the continuous research for improvement of process performance and reduction of environmental impact
4. The awareness of the company goals by all the company staff (employees, collaborators, suppliers, etc.) and the need to comply with the legal provisions, aimed at greater responsibility in the exercise of its activities
5. The responsibility of the whole management for the implementation of the company policy through an approach aimed at the daily involvement of its collaborators accordingly to the Management System, so that every aspect is known and punctually put in place.
6. The responsibility of the whole management for the constant control of the activity, in particular regarding the implementation of the Management system documents provisions.
7. The possibility for anyone to question organizational behaviour in order to improve it; no one can unilaterally modify a codified organizational behaviour, without a prior analysis with the relevant responsible and the Management
8. The scrupulous observance by all of the rules that EUROMAG INTERNATIONAL S.r.l has given itself does not fully achieve its objective if it does not give constant and punctual testimony of the compliance with the legal provisions to the actual and potential customers and to the other concerned parties.

The Management, during the periodic reviews of the Company Management System, reviews the Company Policy and establishes the best corporate strategies aimed at the continuous evolution of the primary objectives and its Management System, plans the specific objectives in consistency with the Company Policy and the changed risk / opportunity conditions, allocating appropriate and adequate technical, human and therefore economic resources. The Management promotes both the involvement and consultation of workers as well as the disclosure of the decisions taken with regard to all personnel, ensuring that they are understood, shared and implemented at all levels.

This Policy is reviewed at least annually and disclosed to all company staff (employees, contractors, suppliers, etc.) and is available to the public, interested parties and anyone who requests it.
