No	Model	Series	Description
1	MC608	Flow Converter	The MC608 A/B/R converter has been designed with the purpose of meeting all the requirements of modern water management systems. The converters MC608 A/B/R are compatible with all EUROMAG INTERNATIONAL sensors. MC608A-Main Powered (AC/DC) MC608B-Battery Powered Vac/dc MC608R-Rechargeable battery + solar panel 10 Watt
2	MUT1000EL (DN25-DN300)	Wafer Mount	MUT1000EL sensors represent the state of art of EUROMAG INTERNATIONAL production for water cycle and process application. The new structure for the generation of the magnetic field, the innovative route of the signal generated by the electrodes, is giving a sensor with an extremely measurement range, keeping the extremely compact dimensions: EL Extended Linearity.
3	MUT2200EL (DN15-DN400)	Flanged Mount	MUT2200EL and MUT2500EL represent the state of art of EUROMAG INTERNATIONAL production for water cycle and process application. The new structure for the generation of the magnetic field, the innovative route of the signal generated by electrodes provide a sensor with an extremely wide measurement range: EL= Extended Linearity. This new series follows the successful tradition of MUT 2200/2500 introducing a measurement range of more than 1:1000 without linearization software. These kind of performances allow very accurate measures on a wide flow rates, that, before, would have been reset because of the effects of the converters cut off.
